

Practice-Ready Correctional Specialty Nurse Focus

- Pre-employment Phase 2 CNCPP(c)

C4CN offers a three-module program as: an introduction to Correctional Nursing and correctional health care settings; guides you in your personal exploration of professional identity as a Correctional Nurse; and assists you to self-assess your fit for nursing excellence within correctional nursing specialty.

This self-paced curriculum allows you to start and stop without losing your place in your personal journey of self-discovery. Numerous opportunities are provided for you to explore content of interest at your choosing within each modules' framework.

At the conclusion of the three pre-employment modules, you will:

- minimum 6 contact hours, earn up to a maximum of 15 contact hours
- receive a certificate of completion and number of contact hours completed with a completed evaluation
- receive an electronic badge for display on your email signature
- obtain referrals to correctional health job board

Time requirement:

- 6 to 15 hours on-line and self-paced education content over three weeks
 - deeper dive into content you are interested in
 - accessible program library at your fingertips
 - Q & A / Network Session
-

Module 1: Build confidence for the correctional nursing specialty.

You will explore the perceived social justice value of Correctional Nursing in the care of persons with complex physical emotional and behavioral- addiction disorders. Gain an introductory understanding of providing care to persons under the jurisdiction of the justice system. A discussion of transition shock, which occurs for students and experienced nurses when entering a new clinical setting, is introduced.

Module 2: Explore your professional identity as a correctional nurse.

In this module you will learn about the many roles of a Correctional Nurse, as well as institutions influencing the scope, standards and regulations of practice for this specialty. A review of the basic competencies needed for entry into these practice settings is completed.

Module 3: Explore the question: Is this the right environment for me?

This module guides you to explore your personal and professional identity and examine the alignment with what you have learned about Correctional Nursing. Fillable scripts walk you

through self-reflections to answer questions about what you will need for successful entry into Correctional Nursing Practice.

Resources are provided to initiate professional development planning and strategies to move to the next step, such as find a mentor, get licensed, get certified, join my professional association and setting a timeline for yourself. Linkages to your professional association and vetted correctional health care job boards/employers are provided.

New Course: *From Exhaustion to Empowerment: Reclaiming Purpose in Correctional Nursing:* This course will empower the experienced correctional nurse by reconnecting to their Professional Identity in Nursing for improved retention outcomes.

Please allow 60 minutes to complete the class, evaluation and to obtain your 1 CE certificate.
