

This Library archive includes:

- grey literature (dissertations, news items, newsletters and association publications, government reports, letters, comments and editorials), as well as
- refereed journal articles
- those pieces of literature we were unable to access
- those pieces of literature discarded

This 'living systematic review' is one that will be continually updated (**we welcome you to submit your refereed and grey literature**), incorporating relevant new evidence quarterly. The approach we use is to locate the material and assure it is focused on correctional nursing. It is not a formal review methodology. This list of references and their links is available and searchable for you to use and can be applied to any type of review methods or knowledge development.

The excel sheets provided are downloadable or can be copied. They are password protected so they cannot be changed by viewers.

How to search the excel sheets?

1. Click the column I want to search in
2. Data Tab > Filter
3. Click the filter icon/arrow that appears at the header of the column
4. Text Filters > Contains
5. Typed in my keyword
6. Document then filtered to all rows containing my keyword
7. Just copied and pasted into a new sheet
